RESULTS OF OPERATIONS

The Fund's net assets increased by \$70.0 million to \$1,442.0 million from March 31, 2024 to September 30, 2024. The Fund had net redemptions of \$21.3 million for the period. The portfolio's performance increased assets by \$92.9 million. The Fund paid distributions totalling \$1.6 million. Series A shares returned 6.3% after fees and expenses for the six-month period ended September 30, 2024. Over the same time period, the Fund's benchmark returned 9.3%. The benchmark is the MSCI World Index (NTR) (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Global Leaders Fund (the Underlying Fund).

During the period, global stocks, as represented by the MSCI ACWI Index, rose 9.49%, in Canadian dollars. The period ended with healthy returns across most major asset classes, despite experiencing several bouts of market volatility. Within the benchmark, the information technology sector led performance, with technology giants showing particularly strong performance.

Early August saw stocks hit hard due to a combination of weaker U.S. economic data, an interest rate hike from the Bank of Japan and lower liquidity. However, the long-anticipated start of the U.S. Federal Reserve Board's interest rate-cutting cycle in September alongside new stimulus measures in China helped to alleviate investor concerns and sparked a strong rebound in stocks.

The Underlying Fund underperformed its benchmark during the period. Stock selection within the health care, communication services, information technology and materials sectors detracted from the Underlying Fund's performance. An underweight allocation to the information technology sector also detracted from the Underlying Fund's performance. The largest individual detractors from the Underlying Fund's performance were holdings in NICE Ltd., ConvaTec Group PLC and Becle SAB de CV. NICE Ltd.'s shares were negatively affected by news that its CEO plans to step down at the end of the year and by increasing competition from players like Microsoft Corp. ConvaTec Group PLC announced good results for the first half of 2024, but investors reacted negatively to flat earnings-per-share growth given the negative impact of cost inflation and higher adjusted net finance expenses. Becle SAB de CV's net financial results for the second quarter of 2024 were negative. An accident at the company's factory in La Rojena, Mexico resulted in a fire, leading to the suspension of operations in the affected area.

Stock selection within the industrials, financials and consumer discretionary sectors contributed to the Underlying Fund's performance. An underweight allocation to the consumer discretionary sector and lack of exposure to the energy sector also contributed to the Underlying Fund's performance. Top individual contributors to the Underlying Fund's performance included holdings in NEC Corp., DBS Group Holdings Ltd. and MISUMI Group Inc. NEC Corp. reported strong performance metrics that reflect its transition from semiconductors and hardware to technology and network solutions. Recent corporate cultural shifts in Japan toward emphasizing profit and cash flow are also reflected in the company's share price performance. DBS Group Holdings Ltd. demonstrated superior asset quality compared to its peers and has achieved a notable recovery in fee income, both of which led to the company's positive performance. MISUMI Group Inc. decided to halt construction of a new plant in southern China, shifting its focus toward rebuilding supply chains and expanding operations in the United States.

We added to the Underlying Fund new holdings in NEC Corp. and Shimadzu Corp. NEC Corp. manufactures personal computers, computer platforms, semiconductors and display panels, and it builds broadband and mobile communication networks. Shimadzu Corp. is a Japan-based global leader in the research, development, manufacture, distribution and maintenance of scientific and precision equipment.

We eliminated a holding in Heidelberg Materials AG because of concerns over its current valuation. The company's management delivered positive results in revenue, profitability and sustainability, but the company stock's rising valuation led to lower expectations for future return potential, and we opted to allocate the Underlying Fund's capital to other ideas. A holding in Stericycle Inc. was eliminated from the Underlying Fund following the announcement that Waste Management Inc. had made an offer to acquire the company with an all-cash offer. A holding in Schneider Electric SE was sold from the Underlying Fund after strong share price performance.

Overall, the Fund underperformed its benchmark for the period.

RECENT DEVELOPMENTS

Moderate global economic growth, declining inflation and central bank interest rate cuts have been supportive of global corporate profits. Given this backdrop, corporate earnings growth is expected to expand beyond the largest U.S. companies to international markets and to smaller- and mid-capitalization companies. Given the expected earnings growth convergence, areas such as Continental Europe, Japan and the United Kingdom look attractive given comparatively lower valuations than can be found in the United States. The Chinese equity market remains attractive on a valuation basis, but has been weighed down by weakness in its property market and depressed consumer confidence. The recent announcement of a coordinated effort to support economic growth was received positively by investors.

We believe that if a business is well managed, has a competitive advantage, is growing or holding its market share and is undervalued, it offers a superior future investment proposition. Currently, the Underlying Fund is tilted toward non-U.S.-domiciled businesses and to mid- and smaller-cap companies.

⁽¹⁾ This information is derived from the Fund's semi-annual and annual financial statements.

(5) This information is provided for the period(s)/year(s) ended September 30, 2024 and March 31.

⁽²⁾ Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.
