Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	15,977,007	Discounted cash flows	Credit spreads
Equity	9,103,431	Capitalized cash flow	Discount rate, sales growth rate

The above investments are valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in credit spreads, would result in an increase or decrease in a fair value of approximately \$799,000.

Capitalized cash flow: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in the discount rate and sales growth rate, would result in an increase or decrease in a fair value of approximately \$455,000.

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	15,970,300	Black-Derman-Toy/Lattice Model	Credit spreads, Interest Rate Volatility
Equity	8,708,961	Capitalized Cash Flow, Recent Transaction	Discount rate, Sales growth rate, EBITDA Multiple

The above investments are valued using the valuation techniques detailed below:

Black-Derman-Toy/Lattice Model: The investment is valued based on its future cash flows while incorporating interest rate modeling into the pricing framework and accounting for prepayment option.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in credit spreads and interest rate volatility, would result in an increase or decrease in a fair value of approximately \$799,000.

Capitalized cash flow and Recent Transaction: The investment is valued based on its expected future cash flows and the recent transaction price.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in the discount rate, sales growth rate and the EBITDA multiple, would result in an increase or decrease in a fair value of approximately \$435,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2025 and March 31, 2025.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	2,659,738		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	2,566,149		
Bond	1,461,745	Black-Derman-Toy/Lattice Model	Credit spreads, Interest Rate Volatility

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Black-Derman-Toy/Lattice Model: The investment is valued based on its future cash flows while incorporating interest rate modeling into the pricing framework and accounting for prepayment option.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in credit spreads and interest rate volatility, would result in an increase or decrease in a fair value of approximately \$73,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2025 and March 31, 2025.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	20,915,320		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	20,179,367		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2025 and March 31, 2025.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	1,203,623	Black-Derman-Toy/ Lattice Model	Credit spreads, Interest Rate Volatility

The above investment is valued using the valuation techniques detailed below:

Black-Derman-Toy/Lattice Model: The investment is valued based on its future cash flows while incorporating interest rate modeling into the pricing framework and accounting for prepayment option.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in credit spreads and interest rate volatility, would result in an increase or decrease in a fair value of approximately \$60,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2025 and March 31, 2025.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Funds	192,327,460		

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Funds	187,969,767		

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2025 and March 31, 2025.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	96,888,028		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	93,478,802		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2025 and March 31, 2025.
