RESULTS OF OPERATIONS

The Fund's net assets decreased by \$190.4 million to \$1,240.2 million from December 31, 2022 to June 30, 2023. The Fund had net redemptions of \$188.2 million for the period. The portfolio's performance increased assets by \$25.9 million. The Fund paid distributions totalling \$28.1 million. ETF C\$ Series returned 1.9% after fees and expenses for the six-month period ended June 30, 2023. Over the same time period, the Fund's benchmark returned 1.7%. The benchmark is the FTSE Canada Short Term Corporate Bond Total Return Index (the Benchmark or the Index).

Please refer to the "Past Performance" section which outlines the performance of the Fund's other units.

The economy was surprisingly resilient during the period, despite further tightening of monetary policy. Employment, services and housing were particularly strong. Business cycle indicators were weaker, but corporate earnings fared well versus pessimistic expectations. Markets were rattled by U.S. regional bank failures in March 2023 and a prolonged U.S. government debt ceiling negotiation into the end of May. However, both issues were resolved in a manner that limited any near-term impact to the real economy.

Central banks made progress on reducing inflation. The U.S. consumer price index (CPI) declined from 6.5% to 3%, and core CPI fell from 5.7% to 4.8%. The Bank of Canada paused and then restarted interest rate increases after progress on core inflation measures stalled and it appears the U.S. Federal Reserve Board will recommence tightening in July. Central banks signalled their resolve to bring inflation back down to their target levels, and it is likely that further interest rate increases will be necessary to achieve that objective.

Markets experienced volatility due to investors' changing sentiment about the central bank monetary tightening cycle as well as U.S. bank failures and government debt ceiling negotiations. However, most asset classes performed well. Short-term interest rates rose while longer-term interest rates fell. Government bonds across all tenors generated positive returns. Riskier assets were influenced more by the strength of economic and labour data than tight monetary policy. Investment-grade bond spreads tightened by seven basis points, and high-yield bond spreads tightened almost 80 basis points.

The Fund outperformed its benchmark for the period. Lower front-end duration (sensitivity to interest rates) exposure contributed to the Fund's performance while lower exposure to tightening corporate spreads detracted from the Fund's performance. The Fund also benefited from positioning in credit default swap hedges. The Fund's government duration was increased during bouts of higher interest rates and decreased as interest rates fell, generally rising over the period from 1.07 to 1.29 years. The Fund's government bond duration mix shifted from the U.S. dollar to the Canadian dollar based on the move higher in Canadian interest rates just prior to period-end. The Fund's exposure to corporate debt steadily declined, with Fund holdings concentrated in shorter-duration, higher-quality positions. The Fund held its most significant amount of credit default swap protection at period-end, after swapping from high-yield to investment-grade because of relative valuation.

RECENT DEVELOPMENTS

Excess savings and pent-up post-COVID-19 pandemic demand allowed firms to pass on rising costs to consumers. Higher prices have heightened wage demands, potentially initiating a wage-price spiral. Central banks have repeatedly expressed concern about a more permanent transition to a high inflation regime and the potential of a wage-price spiral. They have highlighted the necessity for businesses to absorb rising labour costs in their margins to stop this dynamic.

We are observing a growing disconnect between market participants and central banks. Investors appear to be anticipating a soft landing with policy changes pre-empting labour market disruptions. In our view, they are either overlooking or underestimating the central banks' messaging. We still anticipate that central banks will maintain restrictive monetary policy until they achieve an environment that alters consumer and corporate behaviour. A pivot is unlikely to happen until after labour markets weaken and inflation returns to target levels.

The Fund has become more defensively positioned. We trimmed the Fund's exposure to riskier assets and extended its duration as interest rates have risen. We held off on significant additions to the Fund as interest rates continue to track a path similar to 2006, where they remain elevated due to surprisingly resilient mainstream data before a delayed hard landing. The Fund will continue to be focused on generating carry from short-duration, high-quality fixed-income securities, while maintaining duration exposure and standing ready to tactically add duration on further rate backups.

LEVERAGE

When a Fund makes investments in derivatives, borrows cash for investment purposes, or uses physical short sales on equities or other portfolio assets, leverage may be introduced into the Fund. Leverage occurs when the Fund's notional exposure to underlying assets is greater than the amount invested. It is an investment technique that magnifies gains and losses. Consequently, any adverse change in the value or level of the underlying asset, rate or index may amplify losses compared to those that would have been incurred if the underlying asset had been directly held by the Fund and may result in losses greater than the amount invested in the derivative itself. Leverage may increase volatility, may impair the Fund's liquidity and may cause the Fund to liquidate positions at unfavorable times.

To achieve its investment objective the Fund exercises leverage through participating in short selling transactions.

The combined use of short selling and cash borrowing by the Fund is subject to an overall limit of 20% of the Fund's net asset value.

During the period/year ended June 30, 2023, the lowest aggregated fair value amount of the leverage exercised by the Fund was \$18.8 million (1.4% of net asset value) and the highest aggregated fair value amount of the leverage used during the period/year was \$21.8 million (1.6% of net asset value).

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs including securities borrowing fees expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable. As of Jun. 30, 2023 and Dec. 31, 2022, 2021, 2020, 2019 and 2018 the trading expense ratio including interest and dividends on short positions was 0.09%, 0.15%, 0.10%, 0.11%, 0.24% and 0.07%, respectively.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended June 30, 2023 and December 31.

(6) Per units amounts are presented in U.S. dollars.

(7) Closing market price.

[^]Historical information pertaining to HST is not available.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart/charts shows/show the Fund's semi-annual and annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, its future performance, strategies or prospects, and possible future Fund action. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," "forecast," "objective," and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risks and uncertainties, both about the Fund and general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement made by the Fund. These factors include, but are not limited to, general economic, political and market factors in Canada, the United States and internationally, interest and foreign exchanges rates, global equity and capital markets, business competition, technological changes, changes in laws and regulations, judicial or regulatory judgments, legal proceedings and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.
