RESULTS OF OPERATIONS

The Fund's net assets increased by \$1.2 million to \$36.0 million from March 31, 2021 to September 30, 2021. The Fund had net redemptions of \$0.4 million during the period. The portfolio's performance increased assets by \$2.2 million. The Fund paid distributions totalling \$0.6 million. Series A shares returned 6.0% after fees and expenses for the six-month period ended September 30, 2021. Over the same time period, the Fund's benchmark returned 5.0%. The benchmark is a combination of the ICE BofAML Global Broad Market Total Return Index - 50% and the MSCI World Total Return Index - 50% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

COVID-19 delta variant infections spread in developed countries, delaying the full reopening of economies. China's regulatory environment became more stringent in a push wealth equality. The U.S. Federal Reserve (Fed) took a more balanced stance during the period, and signalled that it would begin tapering its bond purchases by 2021 year end, with interest rate increases beginning 12 to 18 months later. Government bonds rebounded during the summer months, while growth equities outperformed cyclical stocks. Both the Fed and Bank of Canada indicated that monetary policy would not stay extremely accommodative in perpetuity. This caused investors to think about valuations in the context of marginally tighter monetary policy in the period ahead.

The Fund outperformed its benchmark largely as a result of an overweight exposure to equities and equity selection within Canada and Europe. The Fund's exposure to fixed income securities also contributed to performance.

Stock selection in the United States detracted from performance.

We added a new holding in Compass Group PLC and increased an existing position in Alphabet Inc. Volvo AB was eliminated from the Fund, and Partners Group Holding AG was trimmed.

RECENT DEVELOPMENTS

Our outlook for the next couple of quarters is for continued above-trend growth in North America with elevated levels of inflation. The Fund continues to hold an overweight exposure to equities with a cyclical bias and an underweight allocation to fixed income with a below-benchmark duration (sensitivity to interest rates).

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.
