RESULTS OF OPERATIONS

The net asset value of the Sentry Canadian Fixed Income Private Pool (the Fund) decreased by \$3.5 million to \$6.8 million from March 31, 2019 to September 30, 2019. The Fund had net redemptions of \$3.7 million during the period. The portfolio's performance increased assets by \$0.3 million. The Fund paid distributions totalling \$0.1 million. Series A units returned 3.6% after fees and expenses for the six-month period ended September 30, 2019. Over the same time period, the Fund's benchmark returned 3.7%. The benchmark is the FTSE Canada Universe Bond Total Return Index.

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The global economy weakened as a result of a drop in global trade and the subsequent decline in business spending. Global central banks began loosening monetary policy by either lowering interest rates or expanding their balance sheets. Government bond yields dropped and commodity prices declined. Credit spreads remained flat for most of the period. The Canadian dollar was steady versus the U.S. dollar over the past six months.

The Fund slightly underperformed its benchmark during the period. The Fund's duration (sensitivity to interest rates) strategy contributed to performance, as did an overweight allocation to federal debt. Individual contributors to performance included Province of Ontario 2.9% Dec. 2, 2046 and 407 International Inc. 3.6% May 21, 2047. Both the Province of Ontario bond and 407 International Inc. infrastructure bond benefited from their long duration as yields declined.

An underweight exposure to provincial debt detracted from the Fund's performance. Allocation to floating-rate securities also detracted from performance when the London interbank offered rate (LIBOR) was repriced lower. Individual detractors from performance included a junior subordinated floating-rate perpetual bond issued by TransCanada PipeLines Ltd. Its value eroded as LIBOR declined.

We reduced the Fund's credit exposure during the period and moderately increased credit quality. The Fund's duration was lengthened, which increased the risk-reward potential of a change in yields. We added a new floating-rate perpetual bond position issued by Morgan Stanley, which added yield with no duration risk. An existing holding in Government of Canada real return bond 4.0% Dec. 1, 2031 was increased. This inflation-protected bond was added as breakeven rates narrowed. CVS Health Corp. 4.3% Mar. 25, 2028 was eliminated to take profits. Sobeys Inc. 5.79% Oct. 6, 2036 was trimmed after much-improved operations at the Canadian grocery store.

RECENT DEVELOPMENTS

We expect global growth to continue to slow as businesses retrench and consumer spending weakens in response. We will maintain the Fund's duration strategy with respect to government bonds, and will opportunistically add select corporate bonds.

Effective September 19, 2019, James McPhedran became a member of the Independent Review Committee (IRC) of CI Funds and effective August 15, 2019, John Reucassel resigned as a member of the IRC of CI Funds.

Funds' Mergers

On September 23, 2019, CI Investments Inc. announced Funds' mergers. The mergers, subject to receiving all necessary unitholder and regulatory approvals, as applicable, will take effect on or about November 22, 2019. If approved, Sentry Canadian Fixed Income Private Pool will merge into CI Canadian Fixed Income Private Pool.

- a) trades in securities of CI Financial Corp.; and
- b) purchases or sales of securities of an issuer from or to another investment fund managed by the Manager.

The applicable standing instructions require that related party transactions be conducted in accordance with the Manager's policies and procedures and that the Manager advise the IRC of any material breach of a condition of the standing instructions. The standing instructions require, among other things, that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager uninfluenced by considerations other than the best interests of the Fund; (c) are made in compliance with the Manager's policies and procedures; and (d) achieve a fair and reasonable result for the Fund. The Fund relied on the IRC's standing instructions regarding related party transactions during this reporting period.

Except as otherwise noted above, the Fund was not a party to any related party transactions during the period ended September 30, 2019.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2019 and the years ended March 31.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the periods shown were reinvested in additional units of the relevant series of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following charts show the Fund's semi-annual and annual performance for each of the periods shown and illustrate how the Fund's performance has changed from period to period. In percentage terms, the charts show how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period, except where noted.

1 2017 return is for the period from July 4, 2016 to March 31, 2017.

2 2017 return is for the period from November 14, 2016 to March 31, 2017.
