### Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	225,255,790	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund As at March 31, 2024 and 2023.

### Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

<b>Asset Type</b>	<b>Fair Value \$</b>	<b>Valuation Techniques</b>	<b>Significant Unobservable Inputs</b>
Equity	28,438,341	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$1,422,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2024 and 2023.

\*\*Change in unrealized gain (loss) related to investments held at March 31, 2023 was \$136,526.

During the year ended March 31, 2023, investments with a fair value of \$41,000 were transferred out of Level 1 into Level 3 as quoted market prices were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equity	800,968	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$40,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2024 and 2023.

\*\*Change in unrealized gain (loss) related to investments held at March 31, 2023 was \$136,526.

During the year ended March 31, 2023, investments with a fair value of \$41,000 were transferred out of Level 1 into Level 3 as quoted market prices were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equities	800,968	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$40,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2024 and 2023.

## Fund Specific Notes to Financial Statements

### Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bonds	23,412,363	Discounted cash flows	Credit spreads
Bond	7,113,385	Market comparable analysis	Estimated sale price, discount rate
Equity	9,102,777	Capitalized cash flow	Discount rate, sales growth rate

The above investments are valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$1,171,000.

Market comparable analysis: Bonds are valued based on comparable companies bond valuation.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$356,000.

Capitalized cash flow: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$455,000.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bonds	9,792,339	Market comparable analysis	Estimated sale price, discount rate
Bonds	11,661,996	Recent transaction	Recent transaction price
Equities	5,333,455	Market comparable analysis	Estimated sale price, discount rate
Equities	11,131,914	Recent transaction	Recent transaction price

The above investments are valued using the valuation techniques detailed below:

Market comparable analysis: Bonds and Equities are valued based on comparable companies bond and equity valuation.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$756,000.

Recent transaction: The investments are valued based on recent completed transactions, which may include external financing, secondary market trades or other transactions near the measurement dates.

For investments valued based on recent transactions, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund As at March 31, 2024 and 2023.

\*\*Change in unrealized gain (loss) related to investments held at March 31, 2023 was \$296,190.

During the year ended March 31, 2023, investments with a fair value of \$216,000 were transferred out of Level 3 into Level 1 as quoted market prices became available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	2,282,621	Net asset value as reported by underlying fund's investment manager	Net asset value
Bond	3,555,100	Discounted cash flows	Credit spreads

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$117,000.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equities	1,233,235	Market comparable analysis	Estimated sale price, discount rate
Bond	2,264,253	Market comparable analysis	Estimated sale price, discount rate

The above investments are valued using the valuation techniques detailed below:

Market comparable analysis: Bonds and Equities are valued based on comparable companies bond and equity valuation.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$175,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.

During the year ended March 31, 2023, investments with a fair value of \$854,000 were transferred out of Level 3 into Level 1 as quoted market prices became available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	17,949,795	Net asset value as reported by underlying fund's investment manager	Net asset value
Bonds	8,734,643	Discounted cash flows	Credit spreads

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$437,000.

as at March 31, 2023

Asset Type	Fair Value	Valuation Techniques	Significant Unobservable Inputs
Bonds	7,656,890	Recent transaction	Recent transaction price

The above investments are valued using the valuation techniques detailed below:

Recent transaction: The investments are valued based on recent completed transactions, which may include external financing, secondary market trades or other transactions near the measurement dates.

For investments valued based on recent transactions, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund As at March 31, 2024 and 2023.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value	Valuation Techniques	Significant Unobservable Inputs
Bond	1,125,551	Discounted cash flows	Credit spreads

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$56,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund As at March 31, 2024 and 2023.

### Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

<b>Asset Type</b>	<b>Fair Value \$</b>	<b>Valuation Techniques</b>	<b>Significant Unobservable Inputs</b>
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	12,361,117		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2024 and 2023.

### Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Funds	125,055,451		

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund As at March 31, 2024 and 2023.

\*\*Change in unrealized gain (loss) related to investments held at March 31, 2023 was \$1,253,462.

During the year ended March 31, 2023, investments with a fair value of \$914,000 were transferred out of Level 3 into Level 1 as quoted market prices became available for these investments and investments with a fair value of \$1,066,000 were transferred out of Level 3 into Level 2, as observable market inputs became available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bonds	1,521,379	Recent transaction	Recent transaction price
Equities	1,995,210	Recent transaction	Recent transaction price

The above investments are valued using the valuation techniques detailed below:

Recent transaction: The investment is valued based on recent completed transaction, which may include external financing, secondary market trades or other transactions near the measurement dates.

For investments valued based on recent transactions, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund As at March 31, 2024 and 2023.

### Level 3 Reconciliation (cont'd)

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	49,053,196	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2024 and 2023.

### Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	5,937,230	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	5,158,285	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.

\*\*Change in unrealized gain (loss) related to investments held at March 31, 2023 was \$1,991,650.

During the year ended March 31, 2023, investments with a fair value of \$8,314,000 were transferred out of Level 2 into Level 3 as observable market inputs were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	9,895,383		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	8,597,141		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.

During the year ended March 31, 2023, investments with a fair value of \$8,314,000 were transferred out of Level 2 into Level 3 as observable market inputs were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Funds	14,146,015	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,597,141	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	17,688,209	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,597,141	Net asset value as reported by underlying fund's investment manager	Net asset value

\*\*Change in unrealized gain (loss) related to investments held at March 31, 2023 was \$1,991,650.

During the year ended March 31, 2023, investments with a fair value of \$8,314,000 were transferred out of Level 2 into Level 3 as observable market inputs were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	9,895,383	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,597,141	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.

During the year ended March 31, 2023, investments with a fair value of \$8,314,000 were transferred out of Level 2 into Level 3 as observable market inputs were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	9,895,383	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,597,141	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.

\*\*Change in unrealized gain (loss) related to investments held at March 31, 2023 was \$1,672,986.

During the year ended March 31, 2023, investments with a fair value of \$6,984,000 were transferred out of Level 2 into Level 3 as observable market inputs were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,312,122	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	7,221,599	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.

During the year ended March 31, 2023, investments with a fair value of \$6,485,000 were transferred out of Level 2 into Level 3 as observable market inputs were no longer available for these investments.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	7,718,399		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2023

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	6,705,770		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2024 and 2023.
