# Invesco Income Growth Fund (to be renamed CI AIMvest Income Growth Fund) - Series T6

## How risky is it?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge the risk is to look at how much a fund's returns change over time. This is called "volatility."

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

## Risk rating

CI Global Asset Management has rated the volatility of this Fund as **Medium**.

This rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

|     |               |               |                |      |
|-----|---------------|---------------|----------------|------|
| Low | Low to medium | <b>Medium</b> | Medium to high | High |
|-----|---------------|---------------|----------------|------|

For more information about the risk rating and specific risks that can affect the Fund's returns, see *Part B: Specific Information About Each of the Funds Described in this Document* section of the Fund's simplified prospectus.

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

## How has the Fund performed?

### Year-by-year returns

This chart shows how Series T6 units of the Fund performed in each of the past 10 years. The Fund dropped in value in two of the 10 years. The range of returns and change from year to year can help you assess how risky the Fund has been in the past. It does not tell you how the Fund will perform in the future.

### Best and worst three-month returns

This table shows the best and worst returns for the Series T6 units of the Fund in a three-month period over the past 10 years. The best and worst three-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

|                     | Return | Three months ending | If you invested \$1,000 at the beginning of the period |
|---------------------|--------|---------------------|--------------------------------------------------------|

## Who is this Fund for?

### Investors who:

- Want capital growth and income over the medium to long term
- Want a diversified Canadian balanced investment
- Are comfortable with medium risk

Series T6 is appropriate for investors who want to receive regular distributions.

The Fund is not appropriate if you have a short-term investment horizon.

## A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether you hold the fund in a registered plan, such as a registered retirement savings plan or a tax-free savings account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

### More about the trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the Fund. It is for the services and advice that your representative and their firm provide to you. CI Global Asset Management pays the trailing commission to your representative's firm. It is paid from the Fund's management fee and is based on the value of your investment. The rate depends on the sales charge option you choose.
