What does the fund invest in?

The fund seeks to replicate, to the extent reasonably possible, the performance of a portfolio of companies located in developed markets that exhibits a lower downside volatility than the broader developed equity markets, net of expenses. Currently, the ETF C\$ Hedged Series units of the fund seek to replicate the performance of the Solactive DM Minimum Downside Volatility Hedged to CAD Index NTR (the "Index"), net of expenses, or any successor thereto.

The charts below give you a snapshot of the fund's investments on March 31, 2025. The fund's investments will change to reflect changes in the Index.

Total number of investments **245**

Investment mix (March 31, 2025)

How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

CI Global Minimum Downside Volatility Index Fund (formerly CI Global Minimum Downside Volatility Index ETF) (CGDV) - ETF C\$ Hedged Series

Risk rating

CI Global Asset Management has rated the volatility of this fund as **low to medium**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see the "Risk Factors" section of the fund's prospectus.

No guarantees

Funds do not have any guarantees. You may not get back the amount of money you invest.

How has the fund performed?

This section tells you how this series of securities of the fund have performed over the past 1 calendar year(s). Returns¹ are after expenses have been deducted. These expenses reduce the fund's returns. This means that the fund's returns may not match the returns of the Index.

¹Returns are calculated using the fund's net asset value (NAV).

Year-by-year returns

This chart shows how this series of securities of the fund performed in the past 1 calendar year(s). This fund series has not dropped in value in the last 1 calendar year(s). The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for this series of securities of the fund in a 3-month period over the past 1 calendar year. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	9.1%	January 31, 2024	Your investment would rise to \$1,091.
Worst return	-5.4%	October 31, 2023	Your investment would drop to \$946.

Average return

As at March 31, 2025, a person who invested \$1,000 in this series of the fund since inception has \$1,244. This works out to an annual compounded rate of return of 10.4%.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF securities. The ask is the lowest price a seller is willing to accept if you want to buy ETF securities. The difference between the two is called the "bid-ask spread".
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

CI Global Minimum Downside Volatility Index Fund (formerly CI Global Minimum Downside Volatility Index ETF) (CGDV) - ETF C\$ Hedged Series

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell securities at the current market price. A limit order lets you set the price at which you are willing to buy or sell securities.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this fund for?

Investors who:

- want exposure to a diversified portfolio of global equity securities
- are looking for long-term capital appreciation with lower volatility compared to the global equity market
- want to receive regular quarterly cash flows (if any)
- can tolerate low to medium risk

A word about tax

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, distributions from the fund are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell this series of securities of the fund. Fees and expenses, including any trailing commissions, can vary among funds.

Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell securities of the fund. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free funds or require a minimum purchase amount.

2. Fund expenses

You don't pay these expenses directly. They affect you because they reduce the fund series' returns.

As of December 31, 2024, the fund series' expenses were 0.44% of its value. This equals \$4.40 for every \$1,000 invested.

	Annual rate (as a % of the fund series' value)
Management expense ratio (MER) This is the total of the fund series' management fee and operating expenses.	0.39%
Trading expense ratio (TER) These are the fund series' trading costs.	0.05%
Fund expenses	0.44%

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the fund. It is for the services and advice that your representative and their firm provide to you.

This fund series doesn't have a trailing commission.
