How risky is it?

The value of the pool can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a pool's returns change over time. This is called "volatility".

In general, pools with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Pools with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk Rating

CI Investments Inc. has rated the volatility of this pool as **low to medium**.

This rating is based on how much the pool's returns have changed from year to year. It doesn't tell you how volatile the pool will be in the future. The rating can change over time. A pool with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the pool's returns, see the "What are the risks of investing in this Fund?" section of the pool's simplified prospectus.

No guarantees

Like most mutual funds, this pool doesn't have any guarantees. You may not get back the money you invest.

How has the fund performed?

This section tells you how Series I securities of the pool have performed over the past 2 years. Returns are after expenses have been deducted. These expenses reduce the pool's returns.

Year-by-year returns

This chart shows how Series I securities of the pool performed in each of the past 2 years. The pool did not drop in value in any of the 2 years. The range of returns and change from year to year can help you assess how risky the pool has been in the past. It does not tell you how the pool will perform in the future.

Best and worst 3-month returns

This table shows the best and worst returns for Series I securities of the pool in a 3-month period over the past 2 years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period
Best return	2.3%	April 30, 2017	Your investment would rise to \$1,023
Worst return	-3.5%	July 31, 2017	Your investment would drop to \$965

Average return

A person who invested \$1,000 in Series I securities of the pool on the series' start date would have had \$1,017 as of April 30, 2019. This works out to an annual compound return of 0.6%.

Who is this fund for?

This pool may be suitable for you if you:

- are willing to accept a low to medium degree of risk
- are seeking income and the potential for capital appreciation
- are planning to hold your investment for the long term

A word about tax

In general, you'll have to pay income tax on any money you make on a pool. How much you pay depends on the tax laws where you live and whether or not you hold the pool in a registered plan such as a Registered Retirement Savings Plan, or a Tax-Free Savings Account. Keep in mind that if you hold your pool in a non-registered account, pool distributions are included in your taxable income, whether you get them in cash or have them reinvested.
