

Invesco Global Bond ETF

ICGB

Fund description

The ETF invests primarily in investment-grade debt securities of governments, corporations and other issuers around the world.

ETF information

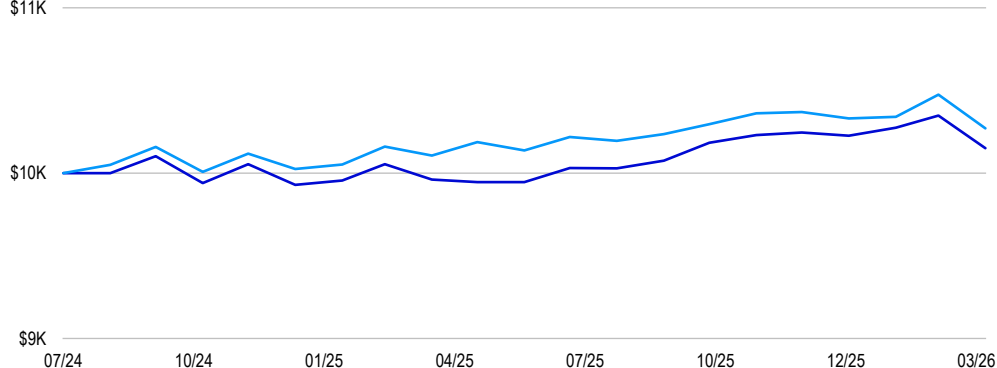

Fund ticker	ICGB
Listing exchange	TSX
Benchmark	Bloomberg Global Aggregate CAD Hedged Index
Currency	CAD
NAV per share	\$19.15
AUM	CAD 83.02m
Number of holdings	692
Distribution frequency	Monthly
Weighted average maturity	9.32 yrs
Weighted average duration	5.43 yrs
Weighted average yield to maturity	4.95%

Quoted yield should not be construed as an amount an investor would receive from a Fund and is subject to change.

The Management Expense Ratio (MER) indicates the trailing 12-month expense ratio, representing the cost of operating the fund. This includes applicable taxes such as HST, GST, and QST, but excludes commissions and other portfolio transaction costs. The MER is expressed as a percentage of the daily average net asset value over the period, including the fund's proportionate share of any expenses from underlying funds, if applicable. Each fund's MER is detailed in its Management Report of Fund Performance (MRFP), which can be found in the Documents tab on [invesco.com/ca](https://www.invesco.com/ca).

Investment risks

Commissions, management fees and expenses may all be associated with investments in exchange-traded funds (ETFs). Unless otherwise indicated, rates of return for periods greater than one year are historical annual compound total returns, including changes in unit value and reinvestment of all distributions, and do not take into account any brokerage commissions or income taxes payable by any unitholder that would have reduced returns. ETFs are not guaranteed, their values change frequently, and past performance may not be repeated. Please read the prospectus before investing. Copies are available from Invesco Canada Ltd. at [invesco.com/ca](https://www.invesco.com/ca)

There are risks involved with investing in ETFs. Please read the prospectus for a complete description of risks relevant to the ETF.

Glossary

Weighted Average Duration is a time measure of a bond's interest-rate sensitivity, based on the weighted average of the time periods over which a bond's cash flows accrue to the bondholder.

Weighted Average Maturity represents the average time until maturity for securities in a portfolio, weighted in proportion to the dollar amount that is invested in the portfolio. WAM measures the sensitivity of fixed-income portfolios to interest rate changes. Portfolios with longer WAMs are more sensitive to changes in interest rates; shorter WAMs indicate less sensitivity.

Weighted Average Yield To Maturity is the total return anticipated on a bond if the bond is held until it matures.

Distribution Frequency represents distribution of income, if any. Distribution of capital gains, interest, dividends, as applicable, if any, may be paid at different frequencies.
