

Invesco RAFI Global Small-Mid ETF

TSX TICKER : PZW.U

AS AT JUNE 30, 2026

FUND OVERVIEW

PZW invests primarily in equities of small- and medium-sized companies from developed markets globally. It currently holds securities of Invesco RAFI US 1500 Small-Mid ETF (Nasdaq ticker: PRFZ) and Invesco RAFI Developed Markets ex-US Small-Mid ETF (NYSE Arca ticker: PDN) (collectively, the Underlying ETFs). The indices tracked by the Underlying ETFs provide exposure to equities of small- and medium-sized companies from developed markets. Rather than weighting companies by market capitalization, the indices tracked by the Underlying ETFs select securities based on four fundamental factors of company size: adjusted sales, adjusted cash flow, dividends plus buybacks and book value plus intangibles. This ETF may also invest in the securities that comprise the indices tracked by the Underlying ETFs. This ETF has a target allocation of 50% for each of the Underlying ETFs. If, on any given day, based on the previous day's closing prices, the weight of an Underlying ETF has become less than 49.5% or more than 50.5% of this ETF, then the ETF will rebalance each of the Underlying ETFs back to 50% the next trading day. In addition, the ETF will rebalance each of the Underlying ETFs back to 50% on a monthly basis.

FUND DETAILS

Inception date	April 2015

Over 35,000 financial advisors have chosen CI Global Asset Management as a partner. We believe that Canadians have the best opportunity for investments success by using the services of a professional financial advisor. [Learn more at ci.com.](#)

¹ The risk level of a fund has been determined in accordance with a standardized risk classification methodology in National Instrument 81-102, that is based on the fund's historical volatility as measured by the 10-year standard deviation of the fund's returns. Where a fund has offered securities to the public for less than 10 years, the standardized methodology requires that the standard deviation of a reference mutual fund or index that reasonably approximates the fund's standard deviation be used to determine the fund's risk rating. Please note that historical performance may not be indicative of future returns and a fund's historical volatility may not be indicative of future volatility.

² Commissions, management fees and expenses all may be associated with an investment in exchange-traded funds (ETFs). You will usually pay brokerage fees to your dealer if you purchase or sell units of an ETF on recognized Canadian exchanges. If the units are purchased or sold on these Canadian exchanges, investors may pay more than the current net asset value when buying units of the ETF and may receive less than the current net asset value when selling them. Please read the prospectus before investing. Important information about an exchange-traded fund is contained in its prospectus. The indicated rates of return are the historical annual compounded total returns net of fees and expenses payable by the fund (except for figures of one year or less, which are simple total returns) including changes in security value and reinvestment of all dividends/distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. ETFs are not guaranteed; their values change frequently, and past performance may not be repeated.

³ Please refer to the fund's simplified prospectus for distribution information.

⁵ The portfolio holdings are subject to change without notice and may only represent a small percentage of portfolio holdings. They are not recommendations to buy or sell any particular security.

The contents are not to be used or construed as investment advice or as an endorsement or recommendation of any entity of security discussed.

Certain statements contained in this communication are based in whole or in part on information provided by third parties and CI has taken reasonable steps to ensure their accuracy.

The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values or returns on investment in an investment fund.

The "Growth of \$10,000 invested" chart shows the final value of a hypothetical \$10,000 investment in securities in this class/series of the fund as at the end of the investment period indicated and is not intended to reflect future values or returns on investment in such securities.

Management Expense Ratio ("MER") represents the trailing 12-month management expense ratio, which reflects the cost of running the fund, inclusive of applicable taxes including HST, GST and QST (excluding commissions and other portfolio transaction costs) as a percentage of daily average net asset value the period, including the fund's proportionate share of any underlying fund(s) expenses, if applicable. The MER is reported in each fund's Management Report of Fund Performance ("MRFP"). MRFPs can be found within the Documents tab on ci.com.

The CI Exchange-Traded Funds (ETFs) are managed by CI Global Asset Management, a subsidiary of CI Financial Corp. CI Global Asset Management is a registered business name of CI Investments Inc.
