- MER is displayed for the period ending December 31, 2024.
- The Management Expense Ratio (MER) indicates the trailing 12-month expense ratio, representing the cost of operating the fund. This includes applicable taxes such as HST, GST, and QST, but excludes commissions and other portfolio transaction costs. The MER is expressed as a percentage of the daily average net asset value over the period, including the fund's proportionate share of any expenses from underlying funds, if applicable. Each fund's MER is detailed in its Management Report of Fund Performance (MRFP), which can be found in the Documents tab on invesco.com/ca.

Commissions, trailing commissions, management fees and expenses may be associated with mutual fund investments. The indicated rates of return are the historical annual compounded total returns, including changes in security value and reinvestment of all distributions, and do not take into account sales, redemptions, distribution or optional charges, or income taxes payable by any security holder, which would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Please read the simplified prospectus before investing. ²Risk is the chance that your investment may not perform as expected. There are different degrees and types of risk, but, in general, the more investment risk you are willing to accept, the higher your potential returns and the greater your potential losses. No reliance should be placed upon the accuracy or reliability of this volatility meter in making an investment decision. The risks associated with an investment in a Fund are set out in the Invesco Simplified Prospectus, which may be obtained at invesco.com/ca or at sedar.com, or from your Invesco Sales representative.
