RESULTS OF OPERATIONS

The Fund's net assets decreased by $47.6 million to $307.1 million from March 31, 2025 to September 30, 2025. The Fund had net redemptions of $100.8 million for the period. The portfolio's performance increased assets by $53.2 million. Series I returned 16.2% after fees and expenses for the six-month period ended September 30, 2025. Over the same time period, the Fund's benchmark returned 22.1%. The benchmark is the S&P/TSX Composite Index (GTR) (the Benchmark or the Index).

The U.S. Federal Reserve Board (Fed) lowered its benchmark interest rate by 25 basis points and signalled its intention for further interest rate cuts at its upcoming meetings. This buoyed equity valuations and sparked optimism that cyclical industries, such as consumer discretionary and construction, could soon recover from depressed levels.

U.S. tariffs triggered broad trade uncertainty and put pressure on consumers who had already absorbed years of price increases and higher interest rates on mortgage, automobile and credit card debt.

The impact of stimulus spending under the U.S. Infrastructure Investment and Jobs Act (IIJA), Inflation Reduction Act (IRA) and CHIPS Act offset moderation in private sector investment. The proliferation of artificial intelligence spurred an increase in data center spending. The U.S. Congress passed the One Big Beautiful Bill Act, which featured tax reductions, cuts to services, such as Medicaid, and new funds for defense and border security. Conflict in Ukraine and the Middle East added uncertainty to energy prices and global supply chains.

The price of gold rapidly appreciated amid persistent inflation, declining interest rates, geopolitical uncertainty, buying from central banks globally and a weaker U.S. dollar.

The Fund underperformed its benchmark for the period. Exposure to the materials sector and stock selection within the financials sector detracted from the Fund's performance. The largest individual detractors from the Fund's performance were positions in UnitedHealth Group Inc., Constellation Software Inc., Danaher Corp., Tourmaline Oil Corp. and S&P Global Inc.

Security selection in the industrials and communication services sectors contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in NVIDIA Corp., Alphabet Inc., Shopify Inc., Microsoft Corp. and Toromont Industries Ltd.

We added a number of new holdings during the period, including Apple Inc., Dollarama Inc., S&P Global, FirstService Corp. and Booking Holdings Inc. Existing positions in Constellation Software, Sun Life Financial Inc., ServiceNow Inc., Walmart Inc. and TFI International Inc. were increased. Positions in Franco-Nevada Corp., Bank of Montreal, CGI Inc., Danaher and Colliers International Group Inc. were eliminated. Holdings in Fairfax Financial Holdings Ltd., AltaGas Ltd., Suncor Energy Inc., Loblaw Cos. Ltd. and Stryker Corp. were trimmed.

RECENT DEVELOPMENTS

We expect trade tariffs imposed by the United States to put upward pressure on inflation, and thus, we favour businesses that have competitive advantages that allow them to exercise pricing power. Consumer spending will likely remain weak amid elevated costs and rising unemployment. We are cautious towards companies that manufacture discretionary goods. We believe that the Fed will take a measured approach to interest rate cuts to balance the risk of rising unemployment and persistent inflation.

Companies are expected to benefit from tax cuts and deregulation under the One Big Beautiful Bill Act. We expect stimulus spending under the IIJA, IRA and CHIPS and Science Act will partially offset slower activity in the private sector. We expect geopolitical uncertainty to drive volatility in energy, gold and other commodity prices, but we remain selective within the resource sub-sector due to its poor track record for capital allocation through the cycle.

We continue to position the Fund in companies that can endure any economic environment as well as businesses with short-term challenges that are trading at prices well below our estimate of their intrinsic value. We place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when economic conditions recover.

(1) This information is derived from the Fund's semi-annual and audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2025 and March 31.
