RESULTS OF OPERATIONS

The Fund's net assets decreased by \$7.5 million to \$57.1 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$6.0 million during the period. The portfolio's performance decreased assets by \$0.9 million. Series I units returned -1.7% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned -0.5%. The benchmark is the MSCI EAFE Total Return Index (the Benchmark or the Index).

During the period, economic activity slowed in response to rising interest rates and geopolitical conflict. Higher levels of inflation persisted. Economic growth in China was slower than expected.

The Fund underperformed its benchmark for the period. Slowing sales volumes detracted from the Fund's performance as economic activity slowed. The impact of higher interest rates and inflation on corporate margins also detracted from the performance of the Fund's holdings. The largest individual detractors from the Fund's performance included holdings in Norsk Hydro ASA, which saw slowing sales revenue, and Keyence Corp., which saw slowing orders for automation devices.

Exposure to the health care sector contributed to the Fund's performance, as did its currency positioning. Top individual contributors to the Fund's performance included holdings in Disco Corp., Shell PLC and Novo Nordisk AS. Disco Corp. continued to see good demand for its microchip-making capabilities. Shell PLC's stock rose amid higher energy prices, which led to greater profitability. Novo Nordisk AS benefited from continued demand for its diabetes and weight loss drugs.

The impact of slower-than-expected growth in China had a negative influence on many European companies. We added a new position in Ipsen SA based on the stability of the company's drug development pipeline. An existing holding in SAP SE was increased based on the stability of the company's consulting and software services. A position in Svenska Handelsbanken AB was eliminated as we consolidated positions within the Fund's banking holdings. The Fund position in LVMH Moët Hennessy Louis Vuitton SE was trimmed as the company has been negatively impacted by China's growth issues.

RECENT DEVELOPMENTS

We believe that volatility in financial markets will continue amid higher interest rates and geopolitical unrest. As such, the Fund remains biased towards high-quality businesses.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.
